AudioThing - Magical Toy Keyboard

About

Years ago I used to do circuit bending and I had many little toy keyboards around. This one was one of my favourite, perfect for 8bit and chiptunes genres or just for fun. This Kontakt Library includes all sounds and rhythms from that old toy keyboard. A little custom GUI let you choose to extend the original range of the instrument and to enable velocity to control the volume of the instrument. There is, also, a low pass filter (just 1 pole) to cut unwanted noise from original samples. The rhythms patch has each rhythm mapped to the white keys (just like the original) and they are tempo-synced to your DAW/sequencer.

- 25 Patches
- 12 Rhythms
- Formats: Kontakt and .wav
- Sample resolution: 44.1Khz / 24Bit
- Size: 108 MB installed
- Custom performance view
- Bonus percussion samples and sound designed instruments
- Native Instruments Kontakt 3.5 full retail versions is required

Installation

Once *AudioThing_MagicalToyKeyboard.zip* is downloaded, you need to unzip it using a software like WinRar or UnRarX. It is better to preserve the internal folder structure, however, it is possible to place instruments and samples to separate folders/harddisks but Kontakt will ask for the new path first time you run the instrument. Kontakt 3.5 or 4 is needed. Kontakt Player will run a demo version of this library for a limited time (and with limited functions).

Instruments

There are 25 .nki files, one for each patch, and rhythms.nki with all rhythms mapped to the white keys (just like the original).
Patches List

11 Piano	21 Flute	31 Brass Ens	41 Elec Guitar	51 Synth-Reed
12 Elec Piano	22 Clarinet	32 Synth-Brass	42 Jazz Guitar	52 Waw Voice
13 Pipe Organ	23 Trumpet	33 Strings	43 Vibraphone	53 Metal Lead
14 Jazz Organ	24 Harmonica	34 Synth-Strings	44 Church Bells	54 Rock Drum
15 Accordion	25 Violin	35 Chorus	45 Bells	55 S.E.

Rhythms

Pops, Rock, 8 Beat, 16 Beat, Disco, Slow Rock, Funk, Swing, Bossa Nova, Samba, March, Waltz

GUI

Velocity button - enable velocity to control volume
Extended button - extend the range of the instruments
Tone Knob - 1-pole lowpass filter to cut unwanted noises

License

The license of this product is granted only to a single user for how many computers he/she has. All sounds and samples in this product are licensed, but not sold, to you by AudioThing for commercial and non-commercial use in music, sound-effect, audio/video post-production, performance, broadcast or similar finished content-creation and production use.

This license expressly forbids any unauthorized inclusion of content contained within this library, or any AudioThing library, into any other sample instrument or loop, samples or SFX library of any kind, without our express written consent.

Thank You

Thank you for buying this AudioThing library, we hope you will have as much fun as we had making this product.
