

ChromaKey is a collection of sounds ported to Kontakt from our soundset for AAS Chromaphone. It features 60 patches divided in 6 categories: Keys, Pads, Plucked Strings, Sequences, Soundscapes, and Various. Chromaphone physical modelling synthesis combines acoustic resonators to produce dynamic and expressive sounds. Despite Chromaphone tagline "creative percussion synthesizer", ChromaKey focuses entirely on hybrid and organic *melodic* sounds.

Specifications

- 60 Kontakt Instruments (.nki)
- 6 Categories
- 616 Samples (44.1kHz / 24Bit)
- Format: Kontakt (NCW compressed samples)

Installation

Once the *AudioThing_ChromaKey.rar* file is downloaded, unzip it using WinRar or UnRarX or a similar type of software. It is recommended that you preserve the internal folder structure, but you can also place the instruments and samples into separate folders. Kontakt will ask for the new path the first time you run the instrument. Kontakt 4 or higher is required to run the instrument. For a limited period of time, Kontakt Player will run a limited demo version of this library.

Patch list
