Frame Drums features a collection of four drums: two Bodhráns and two tambourines. The Bodhrán is a traditional Irish frame drum usually played with a wooden stick. The main Bodhrán measures 18 inches while the main tambourine measures 8 inches. The other drums are small toy/souvenir versions. The frame drums were sampled using sticks, hands, and multiple gestures.

Specifications

- 19 Kontakt Instruments (.nki)
- Up to 8 Round Robin samples
- Up to 3 Velocity Layers
- 160 Samples (48kHz / 24Bit)
- Formats: Kontakt and WAV

Installation

Once the *AudioThing_FrameDrums.rar* file is downloaded, unzip it using WinRar or UnRarX or a similar type of software. It is recommended that you preserve the internal folder structure, but you can also place the instruments and samples into separate folders. Kontakt will ask for the new path the first time you run the instrument. Kontakt 5 or higher is required to run the instrument. For a limited period of time, Kontakt Player will run a limited demo version of this library.

Overview

Envelope
Attack, Decay, Release – Time values of the Volume envelope.

Reverb
Size – Controls the speed of the selected Impulse Response.
Wet – Controls the amount of Reverb signal.

EQ
4-band EQ from -20dB to 20dB.

RR
When available enable or disable the round robin repetitions.
