

Halloween Pumpkins features samples and unusual sound design experiments with traditional Halloween pumpkins. You will find spooky bowed textures, creepy hits, plucked rubber bands, a fake transistor organ and of course an experimental impulse response of the inside of a large pumpkin. The pumpkins were sampled with two mics, a large diaphragm condenser mic and a piezo attached directly to the skin, then mixed to match the perfect eerie sound.

Specifications

- 12 Kontakt Instruments (.nki)
- 5 Kontakt Multis (.nkm)
- Up to 6 Round Robin samples
- 1 Custom Pumpkin IR
- 76 Samples (44.1kHz / 24Bit)
- Size: 67 MB
- Formats: Kontakt and WAV
- Sample sets including:
bowed textures, hits, plucked rubber bands, fake transistor organ

Installation

Once the *AudioThing_Halloween_Pumpkins.rar* file is downloaded, unzip it using WinRar or UnRarX or a similar type of software. It is recommended that you preserve the internal folder structure, but you can also place the instruments and samples into separate folders. Kontakt will ask for the new path the first time you run the instrument. Kontakt 4 or higher is required to run the instrument. For a limited period of time, Kontakt Player will run a limited demo version of this library.

Overview

Controls

Round Robin – Enable/Disable Round Robin

Pumpkin IR – Enable/Disable Pumpkin Impulse

EQ

Bass – EQ Bass Gain

Mid – EQ Mid Gain

Treble – EQ Treble Gain

Envelope

Attack – Attack time of the Volume envelope

Decay – Decay time of the Volume envelope

Release – Release time of the Volume envelope
