Why use sticks when you can use ping pong balls? **Pong Glockenspiel** is a Kontakt Instrument made by recording a toy glockenspiel played with ping pong balls. Two velocity layers (hard and soft) are cross faded to have a smooth transition while the 3 round robin (repetitions samples) avoid the "machine gun" effect of sampled instruments. Tweaking the controls in the custom performance view you can alter the instrument making many new sounds. There are also two ambient instruments, two synth pad instruments and two slowed down instruments crafted using the original samples.

Specifications
- 8 Kontakt Instruments (.nki)
- 3 Round Robin samples
- 2 Velocity layers (cross faded)
- 110 Samples (44.1kHz / 24Bit)
- Formats: Kontakt and WAV
- Bonus: pad, ambience and slowed instruments

Installation
Once the *AudioThing_PongGlockenspiel.rar* file is downloaded, unzip it using WinRar or UnRarX or a similar type of software. It is recommended that you preserve the internal folder structure, but you can also place the instruments and samples into separate folders. Kontakt will ask for the new path the first time you run the instrument. Kontakt 4 or higher is required to run the instrument. For a limited period of time, Kontakt Player will run a limited demo version of this library.

Instruments

PongGlockenspiel_Main.nki

Main instrument

PongGlockenspiel_Main_Double.nki

Artificial octaver effect on main instrument

PongGlockenspiel_Ambient1.nki

Sound designed ambient patch

PongGlockenspiel_Ambient2.nki

Sound designed ambient patch

PongGlockenspiel_Pad1.nki

Sound designed synth-pad patch

PongGlockenspiel_Pad2.nki

Sound designed synth-pad patch

PongGlockenspiel_Slow1.nki

Sound designed slowed down patch

PongGlockenspiel_Slow2.nki
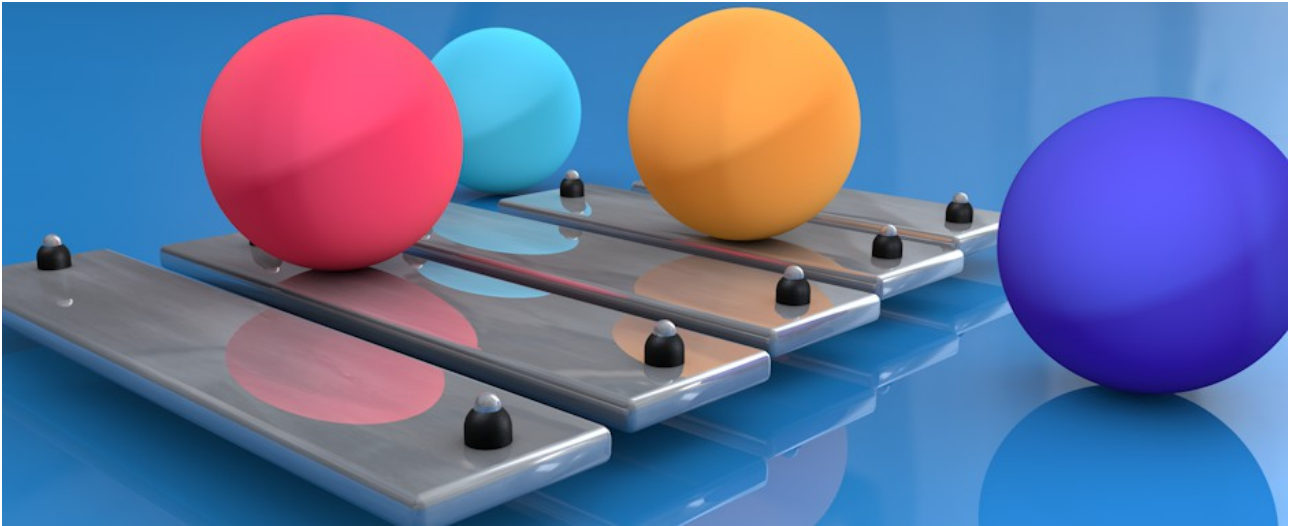

Sound designed slowed down patch
