## Soundscapes Vol.1

### About

Soundscapes, textures and ambiences ready to use as Kontakt instruments or WAV loops. These sounds are divided in two main categories as the source materials: concrete and gear. The raw concrete samples were recorded in different places across Europe (Paris, Dublin, London and Naples) using studio or handy equipment. The raw gear samples were recorded from hardware synthesizers like a [Custom Eurorack Modular Synth](#), guitar pedals and noisy toys like a [Thingamagoop 2](#). Everything was then processed and boxed inside a Kontakt instrument with a custom performance view. The pitch bend is assigned to a  $\pm 24$  pitch transpose, good for glitch effects. All samples are perfect loops, so if you don't have Kontakt you can load them directly.

### Specifications

- 30 Kontakt Instruments (.nki)
- 10 Kontakt Multis (.nkm)
- 31 Samples (48Khz / 24Bit)
- Size: 110 MB installed
- Formats: Kontakt and WAV (loops)
- Custom performance view
- Native Instruments Kontakt 3.5+ full retail versions is required

# Installation

Once *AudioThing\_Soundscapes\_Vol.1.rar* is downloaded, you need to unzip it using a software like WinRAR or UnRARX. It is better to preserve the internal folder structure, however, it is possible to place instruments and samples to separate folders/harddisks but Kontakt will ask for the new path first time you run the instrument. Kontakt 3.5 is needed. Kontakt Player will run a demo version of this library for a limited time (and with limited functions).
