A string is the vibrating element that produces sound in string instruments.

Strings is a collection of sampled string instruments ported from our homonymic sampleset for iZotope Iris. This soundset includes synths, pads, soundscapes, drones, and many effects derived from strings samples. The sampled instruments were a Tenayo AutoHarp, a Romanian Toy Harp, a Baton Rouge Soprano Ukulele, a Chinese Violin, and a Squier Bass. The modulation wheel is assigned to different parameters in each patch.

Specifications

- 50 Kontakt Instruments (.nki)
- 50 Samples (44.1kHz / 24Bit)
- Formats: Kontakt and WAV
- Sample sets including:
  autoharp, toy harp, ukulele, bowed violin, bass

Installation

Once *AudioThing_Strings.rar* file is downloaded, unzip it using WinRar or UnRarX or similar software. Preserving the internal folder structure is recommended, but you can also place the instruments and samples into separate folders. Kontakt will ask for the new path the first time you run the instrument. Kontakt 4.2.4 or higher is required to run the instrument. For a limited period of time, Kontakt Player will run a limited demo version of this library.

GUI

Patch List
